

Corporate Accounting Solutions

We work with our corporate clients to help them stay fully compliant and on top of their Accounting requirements

Bookkeeping and Accounts preparation services

We partner with companies of all sizes who outsource their bookkeeping and accountancy services. Often due to rapid growth and increasing workload, our clients choose to engage us to take on the accountancy burden while they continue to focus on excellent client service.

Our staff set us apart

Our teams are structured in such a way to provide you with expertise tailored to suit your business needs. Our director led teams are heavily involved in client service delivery from day one until the very end, meaning our Directors are involved in all aspects of our work.

Our teams are typically structured with fully qualified accounting and tax professionals who join the firm with long term career aspirations, resulting in a very low turnover of staff. This allows our staff to fully immerse themselves in your business and provide you with the support you need. Our staff are experienced in all forms of accounting, including FRS, IFRS and Trust accounting, meaning we understand your needs and work with you to achieve your goals.

Focus on your business

Working with us allows you to maximize the return from your internal resources. Whether your client needs to provide financial statements to the bank, satisfy investor reviews or share information with auditors, outsourced accounting and bookkeeping services help make sure the data is accurate, in line with the relevant standards and produced on time.

Working with external auditors

Several our team have external audit experience and are supported by existing

auditors within our team. This means we understand the process and the auditing standards. This can help greatly with the efficiency of the process and minimize the impact on your team, ensuring they are answering questions relevant to them, not on accounting requirements.

Tailored packages or multiple clients or periods

We understand that one of the major complaints about the provision of advice and services is being charged overruns, or where time is added to the clock for questions relating to the original service, once it's been provided. At Baker Tilly Channel Islands Limited we believe in sticking to our word and where we provide an upfront quote for services, unless the scope changes dramatically, this is what we charge.

Not only do we fix the fees where possible, but those fees are based on our efficient structure, meaning they are very competitive and great value, without compromising on quality. Our aim is a long-term relationship, not a short-term profit.

Our competitive price structure allows senior staff to be involved. The benefit of working with qualified and experienced accountants results in financial statements that meet the relevant accounting standards as well as insights that can help your business.

All our packages or tailored to your needs and deadlines.
